“Seperate the darkness  
from light...the light  
will be called day and  
the darkness night”

## “Supporting The One”

When we need to visit the doctor in the UK we generally make an appointment and go along, receive our treatment and that is that. Our medication, our hospital treatment, even our operations are usually paid for and so we do not have to worry about the costs.

Imagine being in the position of being sick or disabled or seeing your children or parents sick or disabled and not being able to see a doctor because you cannot afford even the £2 for a consultation. Even if you were able to see your doctor, imagine hearing that you need urgent treatment or hospitalisation but again you are not able to raise the £15-£20 a month for anti-epilepsy or high B.P drugs or £40 for a simple operation. Not being able to purchase Spectacles for £8 or have the £5 for dental treatment.

We also try to get behind some folk who have a long term need to support a family loved one who maybe has a learning or long term physical disability that requires on-going care and finance.

You or your family have need of equipment such as a wheel chair, crutches, a walking frame

but cannot raise the cost of these things and even if you did have the money there are too few places to obtain them.

Ninety Nine To One are involved in raising funds to help such people in the Philippines and Brazil. We send out, via the “Packs for the P.I” or take out disability equipment to the Philippines when visiting, to help these folk who cannot get the basic health support that we take for granted.

If you would like to be involved in the support of “Supporting the One” please let us know and we will pass on, as with any financial help that is given to Ninety Nine To One, 100% of your donation to the project.
